Professional Summary

An Information Technology student with hands-on experience in full stack web development and a solid foundation in JavaScript, HTML, CSS, and backend technologies. I enjoy solving complex problems and creating user-friendly applications that make a difference. While I'm still growing my skills in application development, configuration management, and database design, I collaborate well with teams and communicate effectively. I'm looking forward to bringing my developing technical abilities and eagerness to learn to a position where I can contribute while continuing to expand my expertise.

Experience

Web Developer
Freelance
